

FOR IMMEDIATE RELEASE

AlterG® Announces Addition to Robust Patent Portfolio of Air Based Unweighting Systems

Fremont, Calif. July 18, 2018 -- [AlterG®](#), creator of the [Anti-Gravity Treadmill®](#) technology announced today that the US Patent and Trademark Office has issued the company its fifteenth patent for various embodiments of, and components for air pressure systems designed to unweight users. Patent number 10,004,656 covers multiple methods for mechanical design of air pressure systems and related technology, further securing the company's position as the global leader in the use of air-based body weight support systems for physical performance.

"The issuance of the '656 patent helps us takes yet another step in securing our company as the clear authority for utilizing air-based unweighting for a variety of applications," said Charles Remsberg, chief executive officer for AlterG. "It's incredibly gratifying to look at our product development pipeline and know that we not only have a solid base of intellectual property to start with, but multiple pending patents as well to help further our mission of helping people defy their physical limitations for lifelong mobility."

Anti-Gravity Treadmill technology by AlterG uses multiple patented technologies to enable unprecedented unweighting therapy and athletic training capabilities. A pressurized "anti-gravity" chamber counteracts gravitational forces, gently adjusting body weight from 100% to as little as 20% with unparalleled precision in 1% increments and unrestricted movement not available in any other form of body weight supported therapy. This uniform lifting force reduces impact, pain, and effort thereby reducing barriers to mobility. All while supporting normal gait and balance – and encouraging full, free range of motion in a fall safe environment.

About AlterG

AlterG® develops gravity-defying, transformative technology to empower and inspire people to achieve their physical aspirations. Our patented Differential Air Pressure (DAP) technology redefines what's possible in rehabilitation and athletic training by augmenting physical deficits and increasing mobility to improve orthopedic rehabilitation, the management of neurological and chronic conditions, active aging, and athletic endeavor. AlterG products are found in thousands of leading sports and physical rehabilitation facilities worldwide.
